### Problems logic change

Effective 7/8/2025

The new problems logic in the Portal is anticipated to allow many more problems through due to the removal of a specific requirement. That requirement is that the problem status must be set to active. We will continue to display problems from the most recent CCD from each source. We also added some additional refinements to the logic including:

- Improving CSS definition of resolution date to conform with HL7 standards
- Updating CCD time stamp to reflect time zone differences,
- Improving the deduplication logic when there is more than 1 CCD from a source on the same day to select the CCD that contains a higher number of problems.

- Fewer 'generic' problems removed from the portal

## Display Provider name in Reported Medications tab

Effective 7/2/2025

The provider column in the Reported Medications tab is now being displayed, and users are able to view provider names as obtained in CCDs.
